SWARUP LAB · UC IRVINE

Operon

Your AI research partner for biology.

swaruplab.bio.uci.edu/operon

A simple desktop tool

that runs your biology analyses for you.

Operon puts an AI lab assistant on your laptop. Tell it what you want to do in plain English and it helps clean data, run analyses, and make figures for you. No prior coding experience required.

Chat to analyze

Ask for plots, tables, or QC checks in words.

Works on your HPC

Use your lab laptop or a remote server.

Ready-made recipes

Protocols for scRNA-seq, imaging, and more.

Built by biologists, for biologists.

SwarupLab

What can you do with Operon?

A tour in one page

Analyze single-cell data

Scanpy walkthroughs for scRNA-seq, clustering, and cell-type labels.

Analyze spatial data.

Spatial Transcriptomics Data Analysis

Ask plain-language questions

"Plot UMAP by treatment." Operon writes and runs the code.

Reuse lab protocols

Save your group's best practices and share them with new students.
